

BULLET RESISTANT FENCE

NEXT LEVEL OF SECURITY

The World's Safest Fence.

With all of today's violent attacks, a bullet-resistant perimeter is critical for any property that's vulnerable to hate crimes. Yet the utilitarian hardness typically required to stop a bullet is often an eyesore on a beautiful property. Our Bullet Resistant Fence is specifically engineered and designed to enhance property aesthetics, while providing safety, security and privacy to the occupants.

Many ballistic barriers are hardened material to stop a bullet, but this creates an additional hazard from ricochet. Our fence was designed with the specific intent of a "softer" skin in order to minimize ricochet from lower-caliber guns. Our bullet-resistant core can still absorb the energy of the bullet and eliminate injury from gunfire of pre-tested caliber sizes.

With over 100 years of collective experience in metalworking, the team at Bullistic Barriers has a longstanding tradition of innovation and quality—with safety and security built into every fence. Specifically created for today's violent and dangerous environments, this is a totally new, patent-pending concept in perimeter fence.

No other fence on the market makes this type of impression. Bullistic Barrier's bullet-resistant fence is beautiful, durable, non-corrosive, and provides unparalleled security. In fact, an unprecedented combination of bullet-resistant testing and crash ratings makes it the world's safest fence.

Tested In Accordance with UL-752 Standards, by NTS, An Independent Ballistic Testing Facility.

Ballistic Barriers provide three options for bullet resistance:

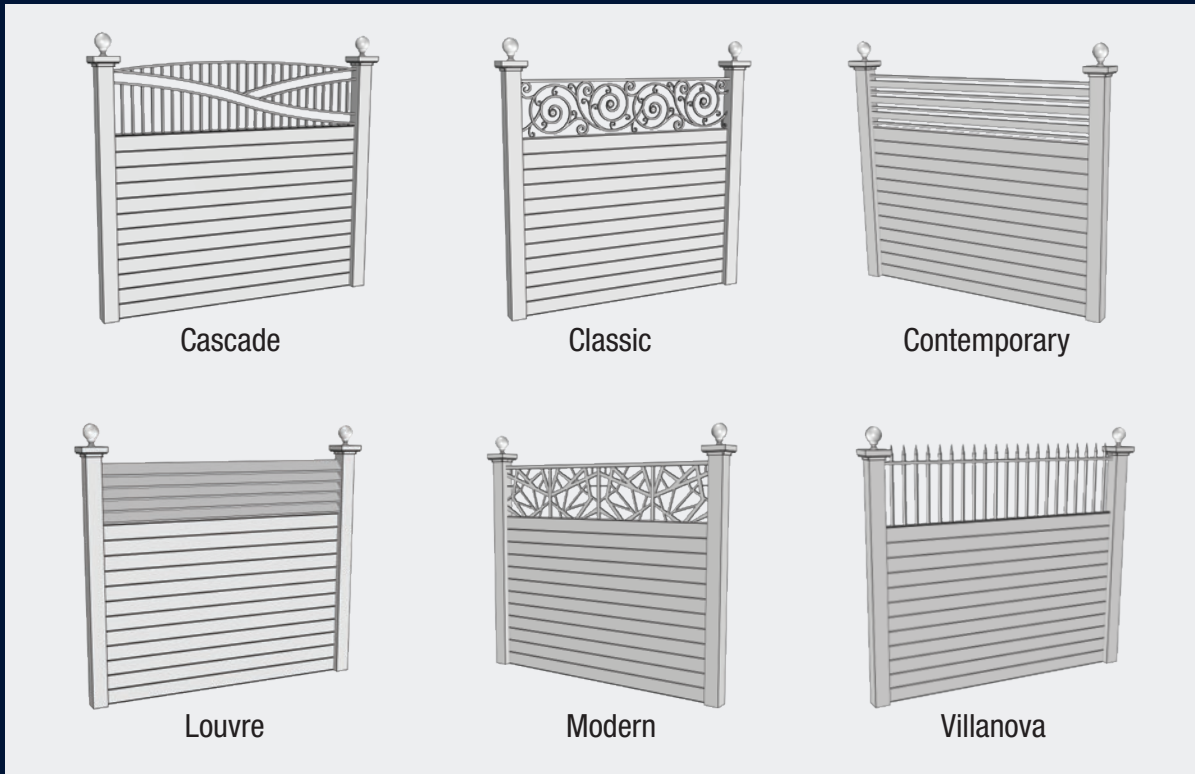

- Level 3 is 3rd party tested to meet UL752 Level 1,2,3, and 6. (9MM, .357 and .44). Plus shotgun buckshot.
- Level 8 is 3rd party tested to meet UL752 Level 4,5,7, and 8 for .30-30 rifle, AR-15 and AK-47. Plus shotgun slug.
- Level 10 is our newest product that is 3rd party tested to meet UL752 Level 9 and 10, plus AP, which means it can stop a 30-06 AP round, .50cal FMJ round, and a .50cal AP round. This product can resist all 10 Levels of the UL-752 ballistic standard.

		Level 3	Level 8	Level 10
UL-752 Level 1	9mm 1 shot			
UL-752 Level 2	.357 3 shots			
UL-752 Level 3	.44 3 shots			
UL-752 Level 4	30-06 rifle 1 shot			
UL-752 Level 5	7.62 rifle .308 caliber (AK-47) 1 shot			
UL-752 Level 6	9mm 5 shots			
UL-752 Level 7	5.56 rifle .223 caliber (AR-15) 5 shots			
UL-752 Level 8	7.62 rifle .308 caliber (AK-47) 5 shots			
UL-752 Level 9	30-06 AP round 1 shot			
UL-752 Level 10	.50 cal FMJ 1 shot			
UL-752 Level 10 + AP	.50 cal Armor Piercing 1 shot			
UL-752-Level 1-3 SG	12 gauge 2 3/4" 1 shot			
UL-752-Level 1-3 SG	12 gauge Buckshot 1 shot			
*NIJ-I	.22 5 shots			
*NIJ-I	.38 Special 5 shots			
*NIJ-II-A	9M 5 shots			
*NIJ-II-A	.357 5 shots			
*NIJ-III-A	.44 Magnum 5 shots			
*NIJ-III	.30 7.62 Nato 5 shots			
*NIJ-IV	.30 30.06 AP 1 shot			
*MIL-SAMIT	.30 7.62 Nato 25 shots			
*MIL-SAMIT	.30 7.62 Nato AP 25 shots			

**Pre-tested and pre-rated, all ratings are being verified by a 3rd party.*

Strength and Beauty.

Bullistic Barriers is at the forefront of product design and innovation. Our spectacular secure designs have artistic accents, that make the fences both visually and architecturally pleasing, while enhancing security at an unprecedented level.

Easy Installation.

The bullet-resistant fence panels are shipped pre-assembled. No assembly is required onsite. Simply install the H columns, hoist the panels into place, fasten the top and place the fence caps.

Bullet Resistant Fences have a powder-coat finish that is environmentally-friendly and finished to AAMA-2604 criteria. Fences have a 15-year structural warranty and posts are pre-engineered for wind load up to 12 ft. tall and 90 mph wind.

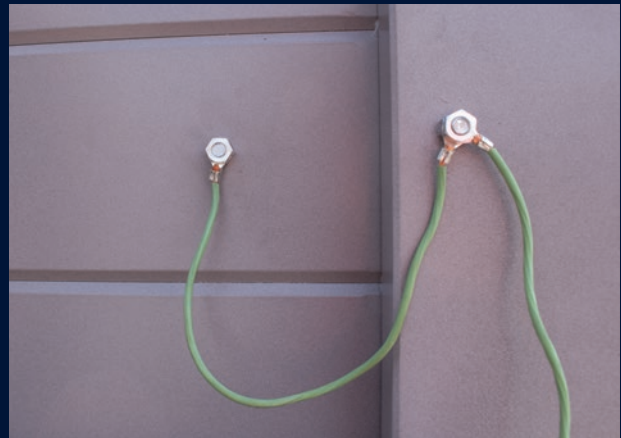

The integrated crash resistance within the bullet-resistant fence makes this innovative fence even more appealing to certain fence market segments.

Power Utility Industry

Bullistic Barriers is committed to providing ballistic protection for the power utility industry. Proper grounding is key to IEEE and NEC requirements which is why we have designed extremely low resistance grounding lug connections. These connections are integrated directly into the ballistic fence panel and post in the manufacturing process, resulting in a streamline installation and grounding process. This provides fast and easy grounding to meet IEEE and NEC grounding requirements for our ballistic fence for power utility substations. And, with our level of architectural beauty and aesthetic appeal, an electrical substation may no longer need to be an eyesore but be part of a beautiful landscape; and covertly provide ballistic protection for electrical substations up to Level 10, to stop a .50 Cal armor piercing bullet.

Grounding Photos

Markets We Serve

We believe there's no better way to provide security and protection for at-risk targets and populations. Properties that can benefit from this groundbreaking fence technology include:

- **Affluent Residential**
- **Government**
- **Data Centers**
- **Corporate Daycare**
- **Resorts**
- **Hospitality**
- **Healthcare**
- **Education**
- **Utility**
- **Energy Infrastructure**

Security Elements

- **Anti-Climb:** Specifically designed for no foot holds or hand holds, makes this fence impenetrable without the aid of equipment.
- **Anti-Cut:** Assailants utilizing powered cutting tools have a difficult and lengthy struggle to cut through the material, plus the inherent inter-connections create an additional layer of protection, providing security teams additional response time.
- **Anti-Breach:** The interlocking panels make this fence virtually seamless to acquire a start of breaching the fence with sledgehammers or prybars.
- **Anti-Ricochet:** Specially designed and engineered to absorb projectiles as opposed to AR plate or concrete that tend to promote ricochets.
- **Crash Resistance:** Special accommodations can be made to panels and posts in the manufacturing process to provide crash resistance.
